WORK EXPERIENCE

System Administrator (HCLTech – Barclays) (Mar 2025 – Present)

- Troubleshoot end-user issues for hardware and software across desktops, laptops, and mobile devices.
- Administer Active Directory accounts, MFA configurations, and user access permissions.
- Manage system deployment and lifecycle processes using SCCM, Intune, and Microsoft Endpoint Manager.
- Build and deploy OS images to ensure compliance and standardization.
- Configure and enroll corporate phones through Intune Company Portal and manage device policies.
- Utilize ServiceNow and Aternity to monitor performance and track incidents for timely resolutions.
- Provide onsite and remote administration support, escalating niche software issues (e.g., Bloomberg terminals).

IT Infrastructure Support Engineer (HCLTech – GIC Project) (Jan 2024 – Feb 2025)

- Delivered end-user and infrastructure support in compliance with IT policies and security standards.
- Administered Active Directory, Azure AD, and MFA for access control and user management.
- Managed imaging, patching, and deployment of systems through SCCM and Intune.
- Collaborated with regional teams to resolve escalated incidents within SLAs.
- Provided deskside and remote support for laptops, desktops, and secure applications.

EUS IT Engineer (Contract – GIC Private Limited) (Oct 2022 – Nov 2023)

- Delivered end-user support ensuring minimal downtime and quick resolution of technical issues.
- Managed user accounts, access control, and permissions within Active Directory and Azure AD.
- Deployed and managed devices using SCCM, Intune, and Microsoft 365 applications.
- Performed OS imaging, driver installations, and endpoint maintenance for corporate systems.
- Collaborated with internal IT teams and vendors to support secure infrastructure operations.

Systems Field Engineer (Intern) (Mar 2022 – Sept 2022)

- Installed, deployed, maintained, and repaired Money Transfer Machines (MTMs).
- Performed network troubleshooting with Cisco and Fortinet devices.
- Assisted with server maintenance and data center operations.
- Conducted weekly operational recovery and data backup procedures.

PROJECTS

Smart Home Automation with Home Assistant – Integrated IoT devices into Home Assistant on Raspberry Pi for local automation and voice control. Configured Zigbee and IR/RF devices for unified management, improving convenience and security.

Collaboration with KIOSK KOLLECTIVE SINGAPORE – Pezzo Singapore – Developed a live survey platform with a leaderboard to enhance user engagement using HTML, CSS, and JavaScript; hosted on Hostinger for optimal performance.

EDUCATION

Singapore Polytechnic – Diploma in Computer Network & Systems (2020 – 2023)

Bukit Batok Secondary School – GCE 'O' Levels (2010 – 2013)

HARD SKILLS

Windows & macOS Administration • Active Directory / Intune / SCCM / Azure AD • Microsoft 365 / ServiceNow / Aternity • Networking & Troubleshooting • OS Imaging & Endpoint Management

SOFT SKILLS

Problem Solving • Teamwork • Adaptability • Communication • Continuous Learning • Organization
